

## A Note about Recovery Month: September

**Recovery Month** promotes the societal benefits of prevention, treatment, and recovery for mental and substance use disorders, celebrates people in recovery, lauds the contributions of treatment and service providers, and promotes the message that recovery in all its forms is possible.

Recovery Month spreads the positive message that behavioral health is essential to overall health, that prevention works, treatment is effective and people can and do recover.

## A Note about the A and D Committee of the Regional Health Council

The mission of the **Hamilton County Regional Health Council** is to serve as the lead community-based organization designated by the Tennessee Department of Health, responsible for community health assessment, regional health planning and the provision of input regarding funding decisions for health and health related initiatives.

## Resources for Residential and Intensive Outpatient Treatment (IOP)

Stable living environments are needed for recovery. Residential treatment programs have a built-in stable environment with supervision and support, but can be more expensive, and more challenging to transition from. Outpatient Treatment is less expensive and can be more practical, but clients need stable living environment support from family/friends/church. Many people do both residential and IOP.

### **Bradford Health Services — Residential and IOP**

## Medically Assisted Treatment (MAT)

MAT is an effective method of addiction treatment that combines medication and counseling. Examples of MAT are methadone + counseling, buprenorphine + counseling, and naltrexone + counseling. The goal of MAT is FULL RECOVERY. It has been shown to

- ♦ Improve patient survival
- ♦ Increase retention in treatment
- ♦ Decrease opiate use and criminal activity in people with addiction problems
- ♦ Increase employment success
- ♦ Improve birth outcomes in women who have addiction problems and are pregnant

Read more at <https://www.samhsa.gov/medication-assisted-treatment/treatment>

Special Resources for those in MAT are needed because many traditional treatment programs do not support the use of medication + counseling.
