Two New Immunization Requirements from the Tennessee Department of Health

Chattanooga, TN—Two new immunization requirements took effect July 1, 2011, for individuals enrolling in kindergarten and college. Children enrolling in kindergarten must have two (2) doses of Hepatitis A vaccine. New full time enrollees in Tennessee colleges must have two (2) doses of varicella vaccine or a history of previous chickenpox.

These requirements are a continuation of the immunization requirements issued by the Tennessee Department of Health in March 2010 for children enrolling in preschool, kindergarten, and seventh grade or as a new student entering a Tennessee school. A new Immunization Certificate is required for children enrolling in pre-school, kindergarten and seventh grade, or for new enrollees in a Tennessee school other than kindergarten or seventh grade. Immunizations are one of the most efficient and cost-effective ways to protect children against childhood diseases and Tennessee law requires documented immunizations. Otherwise, children may be prevented from attending childcare, school, or college.

"More young children and adolescents than ever before are now protected against vaccine-preventable diseases that can cause serious illness or death. We urge parents to consult their healthcare provider and make sure their child receives the appropriate immunizations," said Nettie Gerstle, communicable disease program manager for the Chattanooga-Hamilton County Health Department.

Contact your medical provider or the Health Department to obtain any needed vaccinations and the new school Immunization Certificate. Vaccinations are available during regular clinic hours on a walk-in basis at many Health Department clinics. For locations and clinic hours call 209-8393.

Children enrolling in child care facilities, pre-school, pre-Kindergarten

Infants entering child care facilities must be up-to-date at the time of enrollment and are required to provide an updated certificate after completing all of the required vaccines due by 18 months of age.

- Diphtheria-Tetanus-Pertussis (DTaP, or DT if appropriate)
- Poliomyelitis (IPV or OPV)
- Measles, Mumps, Rubella (1 dose of each, usually given together as MMR)
- Varicella (1 dose or history of disease)
- *Haemophilus influenzae* type B (Hib) – age younger than 5 years only
- Hepatitis B (HBV)
- Pneumococcal conjugate vaccine (PCV) – age younger than 5 years only
- Hepatitis A – 1 dose, required by 18 months of age or older

Children enrolling in Kindergarten

- Diphtheria-Tetanus-Pertussis (DTaP, or DT if appropriate)
- Hepatitis B (HBV)
- Measles, Mumps, Rubella (2 doses of each, usually given together as MMR)
- Poliomyelitis (IPV or OPV) – final dose on or after the 4th birthday now required
- Varicella (**2 doses** or history of disease): previously only one dose was required (*July 1, 2010*)
- **Hepatitis A** –total of 2 doses, spaced at least 6 months apart (**July 1, 2011**)

All children entering 7th grade (including currently enrolled students)

- Tetanus-diphtheria-pertussis booster (“Tdap”) – not required if a Td booster dose given less than 5 years before 7th grade entry is recorded on the DTaP/Td line (*no later than October 1, 2010*)
- Verification of immunity to varicella – 2 doses or history of disease

Children who are new enrollees in a TN school in grades *other* than Kindergarten or 7th

- Diphtheria-Tetanus-Pertussis (DTaP, or DT if appropriate)
- Measles, Mumps, Rubella (2 doses of each, usually given together as MMR)
- Poliomyelitis (IPV or OPV) – final dose on or after the 4th birthday
- Varicella (2 doses or history of disease) – previously only one dose was required
- Hepatitis B (HBV) – previously only for Kindergarten, 7th grade entry

Full-time Tennessee college students

- Measles, Mumps, Rubella (2 doses of each, usually given together as MMR): if born on or after January 1, 1957 only.
- Varicella (2 doses or history of disease): if born on or after January 1, 1980 only, Effective (**July 1, 2011**)

Hepatitis B (HBV) – only for health science students expected to have patient contact (before patient contact begins). Effective (**July 1, 2011**)

Students should also consider the need for the meningococcal vaccine, particularly if the student will be living in a dormitory.
