Vaccination Record Card

When patients receive their first dose with the Health Department, they will receive a Vaccination Record Card with the following important information.

- The vaccine manufacturer (either Moderna or Pfizer)
- The date the first dose of vaccine was given
- The date the second vaccine dose is due

It is important to keep the Vaccination Record Card because when making the appointment for the second dose of vaccine, it helps ensure the correct product is received and in the correct timeframe. The current recommendation is that second dose vaccinations be received either on or after the recommended date on the Vaccination Record Card, not before.
